

## Department of Transportation (DOT) Brake Line Approved: FMV SS106

This hose is manufactured by Pacific Hose Flex (Burleigh Heads, Qld).

The brake hose assemblies are designed with a PTFE lined inner tube and stainless steel outer braid. The assemblies are equipped with crimped tail fittings and rubber wear protections (marked NBM) at the coupling sleeves. A Pacific Hose Flex stencilled label is attached to the outer hose assembly with test and date provisions included on the label.

NOTE: The stencilled label information must be evident on all new products but is not required to be permanently labelled to the hose assembly.

The external diameter of the hose is approximately 6.0 mm (excluding protective sheath) and an internal diameter (nominal bore) of 3.2mm (1/8 inch).

Hose manufactured to SAE 100R14.
