

HOSEFLEX® MINING HOSE

COMPANY PROFILE

2D/3D CAD Drawings

Technical drawings are created by a qualified draftsman using 2D/3D CAD mechanical design software. Models of parts and assemblies are configured to dimensions and tolerances to suffice accurate manufacture, design and installation. Comprehensive technical support and drawings are available upon request and can be supplied with orders or quotations as required.

Hose/Asset Management System

Pacific Hoseflex has developed and implemented a hose management system to offer clients complete traceability and on site product identification. This can be partnered with our on site testing service in accordance to ISO 9712. Our system is flexible and can be customised to accommodate the specific needs of individual clients.

Oxygen Cleaning

This unique service offered by Pacific Hoseflex for piping systems and components to ensure the product is safe for use in Oxygen service and other critical applications.

- Hoses
- Pipe Work
- Expansion Joints
- Fittings
- Custom Fabrication
- Valves
- Pipe Spools
- Manifolds
- Hose Assemblies

Testing & Certification

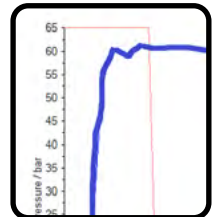

On Site: In accordance with ISO 9712

Test Mediums: Water, Hydraulic Oil, Nitrogen, Hydrogen, Compressed air

Non-Destructive / Destructive Test Methods:

Vacuum, Penetrant Testing, Magnetic Particle, Holiday/Spark Test, Radiographic Testing, Continuity Test, On site Testing (Live video testing Available on Request)

Third Party Inspections: NATA, DNV, Lloyds, CE Certification

Pipe Work & Hose Installation

Pacific Hoseflex has over 20 years experience in fitting, installing and commissioning fluid transfer products. Extensive client consultation and negotiation in relation to each project is conducted to ensure the product installation provides maximum performance and meets client expectations.

Welding Capabilities

Welding Materials: Carbon steel, stainless steel and other high-grade alloys

Welding techniques: Gas Tungsten Arc Welding (GTAW), Metal Inert Gas Welding (MIGW), Manual Metal Arc Welding (MMAW) and Flux Cored Arc Welding (FCAW)

Welding Standards: AS4041 Class 1, ASME B31.3, ASME IX, AS/NZS 3992, ASME BPVC.IX & AS/NZS 1554.1 SP

Crimping Capabilities

Pacific Hoseflex's workshops are equipped with crimping machines which offer a range of crimping services from 1/8" brake lines to 400mm dredging & docking hoses. With extensive expertise in assembly of industrial and hydraulic hose techniques, Pacific Hoseflex provides precision and accurate crimping processes using the latest technology.

Laser marking / tagging and traceability

Pacific Hoseflex offers both metallic and non-metallic laser marking identification on all manufactured products. Specific data can be customized on any item or assembly. All manufactured products are laser marked with a unique number that ensures traceability and can be linked back to PHF's in-house Inspection Test Procedure (ITP). Traceability of products conforms to Quality Management System ISO 9001.

COMPANY PROFILE

Recognised as an industry leader in engineering fluid transfer products, Pacific Hoseflex Pty Ltd (PHF) is a third generation Australian owned and operated business. PHF have the most advanced technology in their market, with an electronic scheduling and ERP System and a fully digitalised workplace. This system ensures the business keeps up to date with client needs and the emergence of Industry 4.0. in manufacturing.

The modern manufacturing facilities are successfully producing products which are distributed throughout Australia and globally. 6 Sigma techniques are used to ensure processes are carried out in the most efficient manner so clients receive the highest quality product.

The main business focus is to deliver superior quality products and excellent service to meet customer needs across a diverse range of industries. Supported with extensive research and development, highly qualified technicians knowledge and expertise has given the company a competitive advantage when tendering within the industry.

Pacific Hoseflex holds the quality-assured stamp of approval across manufacturing (ISO 9001), Workplace Health and Safety (ISO 45001), and Environmental (ISO 14001) work practices. The capacity to meet the requirements of projects, including engineering design and specification, complements our reputation as a market leader.

HOSEFLEX® MINING HOSE

Rubber Hose - Mining

Hard-Wall Hoseflex® Mining Hose

Colour: Black
Tube: NR/BR blend Super Abrasion Resistant Rubber
Cover: Abrasion, UV and Ozone resistant rubber
Reinforcement: Spiral Synthetic fabric and wire helix
Size Available: DN50 to DN1200
Temperature: -30°C / + 70°C

Construction

Use:
 Slurry and water transfer, dewatering and tailings pipelines as well as transfer of chemicals, hydrocarbons and acids.

End connections:
 Plain end, Flanged (fixed or swivel), Flanged full spigot (fixed or swivel), Double flanged, Grooved (roll or cut), Threaded, Butt weld, Custom

Notes

Bend Radius - Based on 700Kpa.
 Max Working Pressure - Determined by construction and fitting/flange design
 Lengths - Can be made up to 10 meters

Rubber Hose - Mining

Soft Wall Hoseflex® Mining Hose

Part No: IH-RWCS

Colour: Black

Tube: NR/BR blend Super Abrasion Resistant Rubber

Cover: Abrasion, UV and Ozone resistant rubber

Reinforcement: Synthetic fabric

Size Available: DN50 to DN1200

Temperature: -30°C / + 70°C

Construction

Use:

Slurry and water transfer, dewatering and tailings pipelines as well as transfer of chemicals, hydrocarbons and acids.

End connections:

Plain end, Flanged (fixed or swivel), Flanged full spigot (fixed or swivel), Double flanged, Grooved (roll or cut), Threaded, Butt weld, Custom

Notes

Max Liner thickness is gauged by flange pattern

Max Working Pressure - Determined by construction and fitting/flange design

No Bend radius advised for non wire reinforced hose

Lengths - Can be made up to 10 meters

Rubber Hose - Mining

Pre-Formed Bend Hoseflex® Mining Hose

Colour: Black
Tube: NR/BR blend Super Abrasion Resistant Rubber
Cover: Abrasion, UV and Ozone resistant rubber
Reinforcement: Spiral Synthetic fabric and wire helix
Size Available: DN50 to DN1200
Temperature: -30°C / + 70°C

Construction

Use: Designed for suction and discharge duties. Used for tight bend radius allowing movement and misalignment. Applications include slurry and water transfer, dewatering and tailings pipelines as well as transfer of chemicals, hydrocarbons and acids.

End connections: Plain end, Flanged (fixed or swivel), Flanged full spigot (fixed or swivel), Double flanged, Grooved (roll or cut), Threaded, Butt weld, Custom

Notes

The design is based on a 90 Degree Bend
 The Bends are built on the radius, straights ends can be added in design state.

HOSEFLEX® MINING HOSE

Rubber Hose - Mining

Pre-formed Bend Hoseflex® Ceramic Hose

Colour: Black
Tube: NR/BR blend Super Abrasion Resistant Rubber
Cover: Abrasion, UV and Ozone resistant rubber
Reinforcement: Spiral Synthetic fabric and wire helix
Size Available: DN80 to DN1200
Temperature: -30°C / + 70°C

Construction

Use: Designed for suction and discharge duties. Used for tight bend radius allowing movement and misalignment. Applications include slurry and water transfer, dewatering and tailings pipelines as well as transfer of chemicals, hydrocarbons and acids. Ceramic preformed bend mining hose is designed to be extremely resistant to abrasion even in high material flows and speeds, preventing material build-up. The ideal solution for high wearing mining and aggregates applications.

End connections: Plain end, Flanged (fixed or swivel), Flanged full spigot (fixed or swivel), Double flanged, Grooved (roll or cut), Threaded, Butt weld, Custom

Notes

The design is based on a 90 Degree Bend
 The Bends are built on the radius, straights ends can be added in design state

Rubber Hose - Mining

Reducer Hoseflex® Mining Hose

Colour: Black
Tube: NR/BR blend Super Abrasion Resistant Rubber
Cover: Abrasion, UV and Ozone resistant rubber
Reinforcement: Spiral Synthetic fabric and wire helix
Size Available: DN50 to DN1200
Temperature: -30°C / + 70°C

Construction

Use: Used in connecting varying sizes of pipework. Prodomentialy used in pump suction and discharge. Applications include slurry or water transfer in mineral processing plants, tailings pipelines and dewatering.

End connections: Plain end, Flanged (fixed or swivel), Flanged full spigot (fixed or swivel), Double flanged, Grooved (roll or cut), Threaded, Butt weld, Custom

Notes

We have left off lengths, there is nothing standard we have ever come across
 Rubber gauges, these are often much heavier in gauge across the wear points (reducing area)

HOSEFLEX® MINING HOSE

Rubber Hose - Mining

Reducer Ceramic Hoseflex® Mining Hose

Colour: Black
Tube: NR/BR blend Super Abrasion Resistant Rubber
Cover: Abrasion, UV and Ozone resistant rubber
Reinforcement: Spiral Synthetic fabric and wire helix
Size Available: DN80 to DN1200
Temperature: -30°C / + 70°C

Construction

Use: Used in connecting varying sizes of pipework. Prodomentially used in pump suction and discharge. Applications include slurry or water transfer in mineral processing plants, tailings pipelines and dewatering.

Ceramic reducer mining hose is designed to be extremely resistant to abrasion even in high material flows and speeds, preventing material build-up. The ideal solution for high wearing mining and aggregates applications.

End connections: Plain end, Flanged (fixed or swivel), Flanged full spigot (fixed or swivel), Double flanged, Grooved (roll or cut), Threaded, Butt weld, Custom

Notes

We have left off lengths, there is nothing standard we have ever come across Rubber gauges, these are often much heavier in gauge across the wear points (reducing area)

Rubber Hose - Mining

Y Piece Hoseflex® Mining Hose

Colour: Black

Tube: NR/BR blend Super Abrasion Resistant Rubber

Cover: Abrasion, UV and Ozone resistant rubber

Reinforcement: Spiral Synthetic fabric and wire helix

Size Available: DN50 to DN1200

Temperature: -30°C / + 70°C

Construction

Use:

Y piece mining hose used in connecting one pipeline into two pipelines or vice versa. Fully customised to suit your existing pipe work. Suitable for both suction and discharge duties. Applications include slurry or water transfer in mineral processing plants, tailings pipelines and dewatering.

End connections: Plain end, Flanged (fixed or swivel), Flanged full spigot (fixed or swivel), Double flanged, Grooved (roll or cut), Threaded, Butt weld, Custom

HOSEFLEX® MINING HOSE

Rubber Hose - Mining

Superflex Hard Wall Hoseflex® Mining Hose

Colour: Black

Tube: NR/BR blend Super Abrasion Resistant Rubber

Cover: Abrasion, UV and Ozone resistant rubber

Reinforcement: Spiral Synthetic fabric and wire helix.

Size Available: DN50 to DN1200

Temperature: -30°C / + 70°C

Construction

Use:

A hard wall hose used in applications which require a tight bend radius. Suitable for both suction and discharge duty.

Lengths - Can be made up to 10 meters

End connections:

Plain end, Flanged (fixed or swivel), Flanged full spigot (fixed or swivel), Double flanged, Grooved (roll or cut), Threaded, Butt weld, Custom

HOSEFLEX® MINING HOSE

Rubber Hose - Chemical

Muff Coupling

Part No.: IH-RMC

Colour: Black

Tube: Black smooth abrasion resistant rubber

Cover: Black smooth synthetic rubber, abrasion and weather resistant

Reinforcement: Plies of high strength synthetic cord incorporating a steel wire helix

Size Available: 51mm - 354mm

Temperature: -35°C +70°C

Construction

Use:

Suction and delivery of abrasive slurry in mining and extractive industries. Muff Coupling hose has many advantages over conventional material handling hoses which have inbuilt flanges.
