

Industrial Gas Hose Solutions

HOSEFLEX.COM

ULTRA HIGH PRESSURE GAS CYLINDER HOSE ASSEMBLIES

Pacific Hoseflex supplies high-performance hose assemblies, fittings, and fluid transfer solutions for the industrial gas sector.

Our **Silversnake®** and **VITALFLEX®** hose ranges are designed for demanding gas cylinder, manifold, and distribution applications where safety, pressure performance, and reliability are essential.

BUILT FOR INDUSTRIAL GAS APPLICATIONS

Suitable for use across:

- Gas cylinder filling systems
- Cylinder pigtails and manifold connections
- Gas pack and bundle transfer systems
- Compressed and liquefied gas transfer
- Specialty gas handling systems
- Fixed plant and process gas infrastructure

PACIFIC HOSEFLEX CAPABILITY

Pacific Hoseflex combines engineering knowledge, manufacturing capability, and technical support to help industrial gas customers source the right hose assembly for their application.

WE CAN ASSIST WITH:

- Product selection
- Standard and custom lengths
- Fitting and end connection options
- Hose assembly requirements
- Technical guidance for new accounts

STANDARDS & QUALITY

Our certified quality management system is supported by internationally recognised standards and continuous improvement in manufacturing practices.

Product standards include ISO, AS, and CGA requirements where applicable.

FEATURED PRODUCTS

SILVERSAKE® - PTFE ULTRA HIGH PRESSURE GAS CYLINDER HOSE

An advanced PTFE high-pressure hose designed for gas cylinder and fluid transfer applications.

Key Advantages

- Excellent routability
- Tight bend radius
- Reduced outer diameter
- Suitable for high-pressure gas and fluid applications
- Standard and custom lengths available

Applications

Oxygen, argon, nitrogen, hydrogen, and acetylene cylinders.

Standard Lengths

600mm, 800mm, 1200mm, 1800mm, 2400mm, 3600mm

Standards

- ISO 1402
- ISO 14113
- CGA E-9:2004

VITALFLEX® - ULTRA HIGH PRESSURE GAS CYLINDER HOSE

A heavy-weight mechanically formed stainless steel hose with an annular close pitch profile.

Product Details

- SS2 annular tube and double braid construction
- Size: 1/4"
- Material: Stainless Steel
- Temperature Range: -276°C to +700°C
- Profile: Annular

Standards

- ISO 10380
- AS 4041 - Class 1, upon request

PARTNER WITH PACIFIC HOSEFLEX

From cylinder filling through to gas distribution infrastructure, Pacific Hoseflex supplies hose solutions for safe, efficient, and reliable operation.
